NEBRASKA AT-A-GLANCE

February 2015

Prepared by:

Logan Seacrest
Research Analyst

INTRODUCTION

This second edition of Nebraska At-a-Glance ranks Nebraska in a variety of metrics – from economics to education to taxes. It is designed to provide policymakers and the public with a snapshot of Nebraska compared to other states.

We hope this report can be used as a quick reference or starting point as you delve deeper into policy areas important to you, your districts, and the State of Nebraska. To assure uniformity across states, the data used in this report comes from the U.S. Bureau of the Census and other national databanks.

Nebraska At-a-Glance is issued biennially. It is our goal to make this report as useful as possible. To that end, policymakers, staffers, and the public are encouraged to provide feedback on how this report can be improved in the future.

Special Thanks to:

The U.S. Bureau of the Census
Congressional Quarterly Press
SAGE Publications
Unicameral Information Office
Virginia Legislative Audit & Review Commission
Economic Modeling Specialists International

DATA & SOURCES

The tables, graphs, and maps in this report use the most current data available for all 50 states, and in some cases, the District of Columbia. Often, per capita or percentage figures are used to account for population differences between states. Source information is located at the bottom of each page, including a link to the raw data. When a ranking was determined using multiple data sets, both sources are listed.

States are always ranked from highest to lowest value, without regard to subject matter. Thus, a higher ranking is not always preferable to a lower ranking. Two states with the same value are generally given the same ranking. However, values are displayed only to a certain decimal place, so states may appear to have the same value, but different rankings because their real values differ. For each table, the 50-state average was calculated using a weighted average formula. Unless otherwise noted, rates are determined using the population of adults 18 years old and older.

This year, the rankings feature an arrow indicating whether Nebraska's rank increased or decreased from the 2013 edition of *Nebraska At-a-Glance*. Most rankings also include a bar graph comparing Nebraska to the national average and a line graph showing Nebraska over time. Some rankings include a map illustrating how states rank in comparison to each other. Bulleted text includes supplemental information about the subject, including definitions, additional rankings, and more detailed data.

IN RANK TO PREVIOUS EDITION

• Race data in the United States Census is based on self-identification. Respondents choose the race (or races) with which they most closely identify, and indicate whether or not they are of Hispanic or Latino origin.

• This ranking is based on the inverse of total respondents who self-identify as “Non-Hispanic Whites.” “White” is defined by Census as a person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

**IN RANK TO
PREVIOUS
EDITION**

• Median household income is the midpoint of all incomes in a state -- half of households made more than the median, and half made less.

• This ranking is based on three-year average of inflation-adjusted single-year medians for the years 2011 through 2013.

• Per capita personal income in Nebraska grew at a rate of 2.3% from 2012 to 2013, higher than the U.S. average of 1.9%.

• This ranking is based on arrests of juveniles 17 years and younger, submitted to the FBI by state law enforcement agencies for 12 months in 2012.

• Because very young children are usually not subject to the criminal justice system, this ranking is calculated by dividing arrests into the state population of 10 to 17 year olds, instead of the entire juvenile population.

IN RANK FROM PREVIOUS EDITION

• Graduation rate is the percentage of the freshman class graduating in 4 years. It is calculated by taking the total number of diploma recipients in 2012, divided by the average membership of the 8th-grade class in 2007, the 9th-grade class in 2008, and the 10th-grade class in 2009.

• Nebraska's dropout rate is 2.2%, below the national average of 3.3%.

IN RANK FROM PREVIOUS EDITION

• Property tax burdens are based on the property tax rate and the tax base. The tax base is determined by the assessed value of the property and the assessment ratio (the share of the assessed value that is subject to tax).

• In 2013, per capita state and local property tax revenue in Nebraska was \$1,560, above the national average of \$1,423.
